

## Diagram for Connecting the Ricoh Digital Cameras to Mac Computer

Modem Port

Printer Port

**NOTE: Your computer may not be configured exactly as the one shown.**

Camera Cable

- Attached the camera cable to either your modem or printer port.
- From the Apple Menu, go to the Chooser and make AppleTalk Inactive.
- From the Apple Menu, go to the Control Panel, to Extension Manager and turn all extensions off except for Quicktime and Quicktime Power Plug.
- Restart your computer and attempt to download. If you receive an error message that the connection is unreliable, then attach the camera cable to the other port and attempt to download.
