

Using Windows 3.X ShortCut Keys and Ricoh PhotoStudio

1. Connect camera to Com 1 (where your mouse is).
2. Restart computer - windows will detect that no mouse is present, click [enter] to accept.
3. At the c:\ prompt, type in [win] to start Windows 3.X
4. After Windows opens, hold down the [alt] key and [W] to bring down the Window menu.
5. Use your down arrow to get to [Photostudio] and hit [enter].
6. Hit [enter] to start PhotoStudio.
7. Hold down the [alt] key and [F] to bring the File Menu down.
8. Hit [D] to bring up the download options.
9. Hold down the [alt] key and [o] to connect to camera.
10. Use your [tab] key to get to [select all] then hit [enter].
11. Use your [tab] key to get to [okay] and then hit [enter].
12. After completing download then hold down the [alt] [F4] to close album (it will probably want you to name the album first).
13. Hold down the [alt] key and [F] to bring down the file menu.
14. Hit [x] to exit PhotoStudio.
15. Hold down the [Windows logo] key and arrow up to shut down your computer.
16. Re-attach your mouse to com 1 and reboot.
