WINDOWS 95 DRIVER INSTALLATION

The following are instructions to install Windows 95 drivers onto a computer for the first time.

- Ensure that there is not a PC Card in any slot of your PCMCIA Card reader.
- Go to **Control Panel** and check for an icon for **“PC CARD PCMCIA”** (see below). If this is not listed, please go to **Add New Hardware** and follow the instructions to add the PC Card slot to your computer.

- Insert the Ricoh Aims Card into the PCMCIA Slot of your computer.
- Windows 95 will detect new hardware and prompt you for the drivers. Please instruct the computer to go to the floppy drive and installation should proceed.

WINDOWS 95 BETA DRIVER REMOVAL

Please follow the instructions below to remove any “Beta Version” of Windows 95 driver software prior to installing the final drivers.

- Insert the Ricoh Aims card into the PC Card slot of your computer. Please open the **Control Panel**, **System** and go to **Device Manager** (see below).

- Remove the old driver “AIMS CARD”.

- From Windows Explorer, delete the following files:
 - C:\WINDOWS\SYSTEM\IOSUBSYS\aims.mpd
 - C:\WINDOWS\INF\oemX.inf
 - These will be a hidden file. In order to see these type of files, go to **View** and then **Options** to show hidden files (see below).

- There maybe several ***oemX.inf*** files (i.e. *oem0.inf*, *oem1.inf* etc.)
- Remove only the Ricoh Aims Driver ***oemX.inf*** files. Double click and open with Notepad or Word to view file.
- Reboot
