SOFTWARE OPERATION AND ACTIVITIES GUIDE

Introduction

Welcome to Ricoh's Software Suite. This suite contains two exciting software packages specifically suited to enhance the capabilities of your new RDC-4200 megapixel digital camera.

The software suite provides the tools you need to download, organize, retrieve, playback and enhance the digital images captured with your new camera:

ArcSoft PhotoBase is a fast and easy-to-use program for keeping track of all of your digital photographs, audio and video clips.

■ Easily locate your images by title, date or description using the easy-to-use search tool.

■ Insert your images into a document or presentation program with drag and drop functionality.

■ Create photo slide shows to share with friends and family.

■ Print your photo albums complete with descriptions and frames.

ArcSoft PhotoStudio is a powerful program which allows you to manipulate and enhance your digital images.

■ Use the color correction features to enhance or alter your images.

■ Apply special effects such as oil painting or sketch.

■ Create stunning panoramas or collages with the auto-stitch feature.

■ Add text to your images with the text tool.

To spark your creativity, we have included ideas on how to take advantage of the images captured with your new Ricoh camera in our **Project Activity Guide** included in this manual.

Software Operation and Project Activities Guide

Uploading and Downloading your RDC-4200 Images

For Windows: Please see ArcSoft PhotoBase Users Manual for detailed instructions.

For Macintosh: Please use the DU-4 software included in your camera kit.

To use the TWAIN Acquire feature of PhotoBase and PhotoStudio, please install the Windows or Macintosh TWAIN drivers included on the DU-4 software CD.

Windows TWAIN installation:

1) Insert DU-4 CD into CD-ROM drive

2) Browse CD for TWAIN folder

3) Double-click on folder

4) Double-click on setup.exe file. Select 16-bit or 32-bit version to be installed.

5) Follow on-screen prompts

6) The RDC-4200 TWAIN drivers are now installed. For additional information, please see the readme file included on the DU-4 CD.

Macintosh TWAIN installation:

1) Insert DU-4 CD into CD-ROM drive

2) Copy the TWAIN folder to the preferences folder in your System folder. If you already have a TWAIN compliant device driver installed, open the TWAIN folder and copy the Ricoh Digital Camera file to the Preferences folder on your hard disk.

3) The RDC-4200 TWAIN drivers are now installed. For additional information, please see the readme file included on the DU-4 CD.
