DIGITAL IMAGE PRODUCTIVITY SOFTWARE SUITE

Introduction

Welcome to Ricoh's Digital Image Productivity Software Suite. This suite is comprised of an exciting selection of applications specifically suited to enhance the capabilities of your new RDC-4300 Megapixel Digital Camera.

This application suite provides the tools to unleash your creativity:

- Design composite images from two or more digital snapshots with ArcSoft's PhotoStudio software.

- Store, print and share a digital album or catalog of your new creations quickly and easily with ArcSoft's PhotoBase.

- Enhance a business flyer with stunning wide angle panoramas. Your new camera's 180° rotating lens and Enroute Imaging's QuickStitch software make this job a **SNAP!**

- Easily create a Web page everyone will want to visit and re-visit by posting interactive virtual reality tours of your home or favorite vacation spot, with amazing ease using the included QuickStitch 360 software.

- Produce presentations and Web shows that entice you to watch and **LISTEN!** Add personalized digital audio and bright images captured with Ricoh's RDC-4300 Digital Camera, use animated 3D logos and graphics created with Metacreations' LogoMotion, then drop into Kai's PowerSHOW to create one-button executable multimedia shows playable on a host of devices.

Uploading and Downloading your RDC-4300 Images and Audio

For Windows: Please see ArcSoft PhotoBase Users Manual for detailed instructions.

For Macintosh: Please utilize the DU-4 software included in your camera kit.

IMPORTANT NOTE: The image upload to camera functions of DU-4 and PhotoBase will support ONLY sound that's been captured with your RDC-4300 camera.

To utilize the TWAIN Acquire feature of PhotoBase, PhotoStudio and PowerShow, please install the Windows or Macintosh TWAIN drivers included on the DU-4 software CD.

Windows TWAIN installation:

1) Insert DU-4 CD into CD-ROM drive

2) Browse CD for TWAIN folder

3) Double-click on folder

4) Double-click on setup.exe file. Select 16-bit or 32-bit version to be installed.

5) Follow on-screen prompts

6) The RDC-4300 TWAIN drivers are now installed. For additional information, please see the readme file included on the DU-4 CD.

Macintosh TWAIN installation:

1) Insert DU-4 CD into CD-ROM drive

2) Copy the TWAIN folder to the preferences folder in your System folder. If you already have a TWAIN compliant device driver installed, open the TWAIN folder and copy the Ricoh Digital Camera file to the Preferences folder on your hard disk.

3) The RDC-4300 TWAIN drivers are now installed. For additional information, please see the readme file included on the DU-4 CD.

Note: The TWAIN drivers will enable you to acquire IMAGES from your RDC-4300 digital camera into most TWAIN compliant applications. TWAIN does not support sound; therefore sound captured with the RDC-4300 camera must be downloaded through PhotoBase or the DU-4 utility.
